

AMENDMENTS TO AND LISTING OF THE CLAIMS

Claims 1-5 (cancelled)

6. (New) A composition comprising:

- a) at least one water immiscible emollient oil in a sufficient quantity to provide emollience to skin;
- b) at least one emulsifying agent capable of forming an emulsion, on the skin with the oil when water is added to the composition, the emulsifier in a quantity such that the oil is substantially removed from the skin;
- c) a physical stabilization enhancing amount of a component selected from the group consisting of a wax and an oil gelling agent that is both water and oil insoluble.

7. (New) The composition of claim 6, wherein the oil is selected from the group consisting of: a mineral oil; an animal oil; a vegetable oil; a silicone oil; an ester; an organic alcohol; a lanolic acid ester; a fatty free acid; and mixtures thereof.

8. (New) The composition of claim 6, wherein the oil is selected from paraffin oil and petroleum jelly oil.

9. (New) The composition of claim 6, wherein the oil is selected from purcellin oil, perhydrosqualene, fish oil, and lanolin oil.

10. (New) In composition of claim 6, wherein the oil is selected from sweet almond oil, palm oil, calophyllum oil, avocado oil, castor oil, cereal germ oil, canola oil, sunflower oil, soybean oil, any jojoba oil.

11. (New) The composition of claim 6, wherein the oil is selected from dimethylpolysiloxane, cyclomethicone, and stearyl dimethylpolysiloxane.

12. (New) The composition of claim 6, wherein the oil is selected from butyl myristate, isopropyl myristate, cetyl myristate, isopropyl palmitate, butylstearate, hexadecyl, stearate, isopropyl stearate octyl stearate, isoceryl stearate, decyl oleate, hexyl laurate di-caprylate of propylene glycol, and di-isopropyl adipate.

13. (New) The composition of claim 6, wherein the oil is selected from oleic alcohol, linoleic alcohol, linolenic alcohol, isostearyl alcohol, and octyl dodecanol.

14. (New) The composition of claim 6, wherein the oil is selected from isopropyl lanolate and isocetyl lanolate.

15. (New) The composition of claim 6, wherein the oil is selected from linoleic acid, myristic acid, palmitic acid, and stearic acid.

16. (New) The composition of claim 6, wherein the emulsifying agent is selected from the group consisting of an ethoxylated carboxylic acid, an ethoxylated glyceride, a glycol ester and derivatives thereof, a monoglyceride, a polyglyceryl ester, a polyhydric alcohol ester, a sorbitan/sorbitol ester, a trimer of phosphoric acid, an ethoxylated fatty alcohol, a propoxylated polyoxyethylene (POE) ester, and mixtures thereof.

17. (New) The composition of claim 6, wherein the wax is selected from the group consisting of: mineral wax; fossil wax; animal wax; vegetable wax; hydrogenated wax that is solid at 25°C; synthetic oil; fatty ester that is solid at 25°C; silicone wax; and mixtures thereof.

18. (New) The composition of claim 6, wherein the wax is selected from microcrystalline wax, paraffin, and petroleum jelly.

19. (New) The composition of claim 6, wherein the wax is selected from ozokerite and montan wax.
20. (New) The composition of claim 6, wherein the wax is selected from beeswax, spermaceti, lanolin wax, and lanolin derivatives.
21. (New) The composition of claim 6, wherein the wax is selected from lanolin alcohols, hydrogenated lanolin, hydroxylated lanolin, acetylated lanolin, fatty acid of lanolin, and acetylated lanolin alcohol.
22. (New) The composition of claim 6, wherein the wax is selected from candelila wax, carnauba wax, sumac wax, cocoa butter wax, and shea butter.
23. (New) The composition of claim 6, wherein the wax is selected from hydrogenated castor oil, hydrogenated palm oil, hydrogenated tallow, hydrogenated cocoa oil, and hydrogenated soy oil.
24. (New) The composition of claim 6, wherein the wax is selected from polyethylene and copolymerized polyethylene waxes.
25. (New) The composition of claim 6, wherein the wax is selected from monomyristate of propylene glycol and myristyl myriatate.
26. (New) The composition of claim 6, wherein the wax is selected from methyloctadecane-oxypolysiloxane, poly(dimethylsiloxyl) steaeroxysiloxane, and dimethicone.
27. (New) The composition of claim 6, wherein the oil gelling agent is selected from the group consisting of finely divided silica, magnesium aluminum silicate, clay, organically modified clay, and mixtures thereof.

28. (New) The composition of claim 6, wherein the oil gelling agent is selected from the group consisting of bentonite, Hectorite, and organophilic clay.

29. (New) The composition of claim 6, wherein the oil gelling agent is selected from the group consisting of stearalkonium Hectorite, Quaternium-18 Hectorite, and Quaternium-18 bentonite.
